

SARS-COV-2 Spike S Trimer Protein

Cat. No. COV-VM4SS

Description

Source	Recombinant SARS-COV-2 Spike S is expressed from HEK293 with His tag and Avi tag at the C-Terminus.
	It contains Val16-Glu1188 trimer design.
Accession	QHD43416.1
Molecular Weight	The protein has a predicted MW of 136.6 kDa. Due to glycosylation, the protein migrates to 175-230 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1EU per µg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE

Formulation and Storage

Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

The spike protein (S) of coronavirus (CoV) attaches the virus to its cellular receptor, angiotensin-converting enzyme 2 (ACE2). A defined receptor-binding domain (RBD) on S mediates this interaction. The S protein plays key parts in the induction of neutralizing-antibody and T-cell responses, as well as protective immunity.

Assay Data

Bis-Tris PAGE

SARS-COV-2 Spike S Trimer on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

ELISA Data

SARS-COV-2 Spike S Trimer, His Tag ELISA

0.1µg SARS-COV-2 Spike S Trimer, His Tag Per Well

Immobilized SARS-COV-2 Spike S Trimer, His Tag at 1µg/ml (100µl/Well). Dose response curve for Human ACE2, hFc Tag with the EC50 of 18.0ng/ml determined by ELISA.
